- Locking mechanism for tablet security
- Direct charging port when detached from dock
- Edge Case to conceal wiring and protect connections and tablet
- Easy to use "lift to release" mechanism
- Integrated kickstand on tablet side

RENAULT S.A. CASE STUDY

The Customer

Renault S.A. is a French multinational vehicle manufacturer established in 1899. As part of the Renault-Nissan Alliance, the company is the fourth-largest automotive group in the world.

The Challenge

The car manufacturer aimed to establish a digital media 'revolution' with **iPad interactive catalog stands** in its showrooms across France. They wanted adjustable kiosks to attract guests with varying display heights and enclosures that concealed the home button to ensure uninterrupted demonstrations.

The Solution

The **Adjustable iPad Floor Stand** with a Metal Executive iPad Enclosure. The stand features **high-grade aluminum** and a cast iron base for stability and style, available in two colors. It can be adjusted to **various heights** and has a compartment for the iPad charging cube. A lockable security cable allows it to be **secured** to a fixed object while remaining mobile.

Customer Feedback

"We have chosen Maclocks to establish our digital media 'revolution' in every one of our France showrooms. This resulted in Maclocks providing 4000 units of two of their best-selling solutions. Their stands are engineered to deliver an "Apple" themed elegant design, offer the best protection & are very easy to use."
